## CLIMATE CHANGE

### LATEST IPCC REPORT ALERTS: THE TIME FOR ACTION IS NOW

**Without immediate and deep emissions reductions across all sectors, limiting global warming to 1.5°C is beyond reach**

**4 April** | IPCC | The Intergovernmental Panel on Climate Change (IPCC) report released on 4 April 2022 shows that limiting warming to around 1.5°C (2.7°F) requires global greenhouse gas emissions to peak before 2025 at the latest, and be reduced by 43% by 2030. At the same time, methane would also need to be reduced by about a third. But even with this, it is almost inevitable that we will temporarily exceed this temperature threshold but could return to below it by the end of the century.

“It’s now or never, if we want to limit global warming to 1.5°C (2.7°F),” said IPCC Working Group III Co-Chair Jim Skea. “Without immediate and deep emissions reductions across all sectors, it will be impossible.”

## ENDEAVOURS: STATEMENT

### SHEM APPEALS FOR IMMEDIATE CEASEFIRE AND FOR PEACE TO BE RESTORED IN UKRAINE AND EVERYWHERE IN THE WORLD

SHEM stands in solidarity with those suffering from aggression in Ukraine and anywhere in the world due to violent actions and appeals for immediate ceasefires so that peace can be restored in all countries and regions involved in armed conflicts. In this sense, SHEM welcomes the recent news of a near future peace agreement between Russia and Ukraine and looks forward to hearing similar news from all regions in armed conflict.
